SUMMARY

Dedicated Full-stack Developer with proven track record of designing and implementing innovative web applications that seamlessly integrate user-centric design with robust functionality. I'm skilled in both front-end and back-end technologies, and have successfully delivered some projects that enhance user experiences while optimizing performance and scalability. With strong foundations in JavaScript, HTML, CSS and frameworks such as Vue.js, React.js and ASP.NET, I am committed to crafting dynamic and responsive web solutions. Aspiring to contribute my expertise in full-stack development to a collaborative team, I am eager to engage in challenging projects that allow me to further enhance my skills to create meaningful software, and contribute to the evolution of cutting-edge digital technologies.

EXPERIENCES

ASP.NET Developer — Central Jakarta, 03/2023 – Present
PT. Galva Galindra Multi Cipta

- Maintain and develop company's web applications based on Functional Specification Design (FSD) guides

- **Databases Skills:** Ms. SQL Server, MySQL, PostgreSQL
- **Team Collaborating & Version Control:** Scrum, Slack, Jira, GitHub, Gitlab, TFS

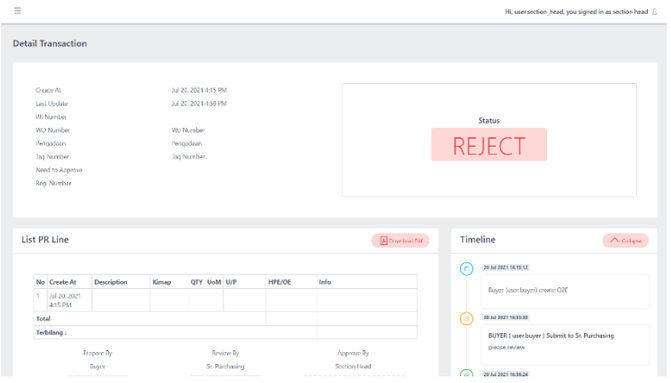
EVENTS & CERTIFICATIONS

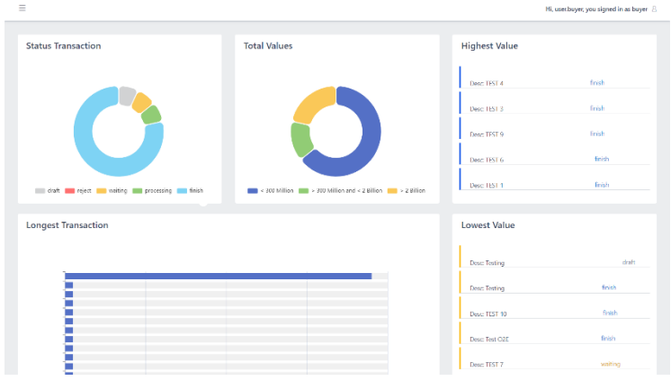
- Dicoding creating web application with React (https://www.dicoding.com/certificates/RVZK6M1GEZD5)
- Hacktober-Fest 2021 by Digital Ocean

PORTFOLIOS

1. Online Owner Estimate

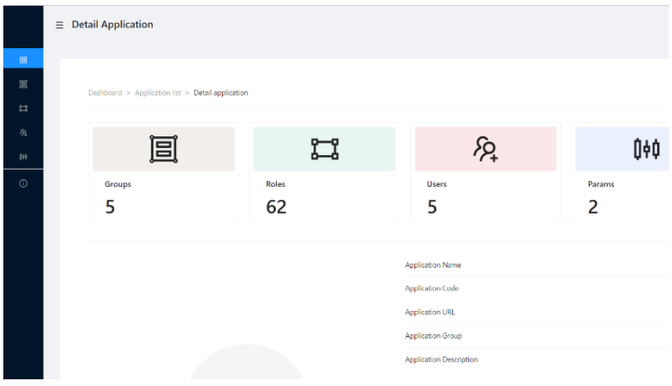
- Description: Web application to assist and monitor calculations in the procurement process
- Front-End: Vue.js (v3), Bootstrap CSS, e-charts library
- Back-End: ASP.NET MVC, Microsoft SQL Server, Pertamina Sign, Peruri, BSSN Digital Signature, SAP

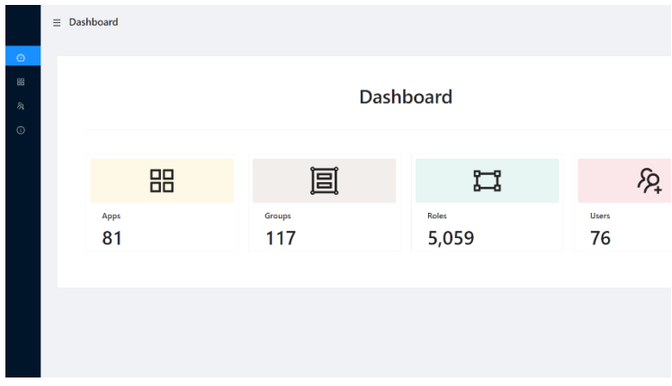




2. User and Application Management System

- Description: Web application to manage user account authentication
- Front-End: Vue.js (v3), Ant Design Vue
- Back-End: CodeIgniter, MySQL





3. Digital Hospital Application

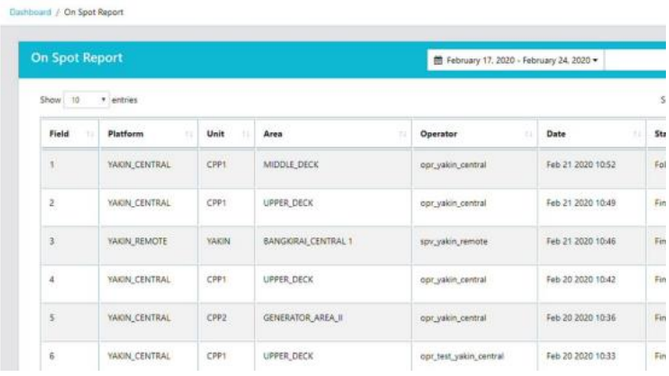
- Description: Web application to monitor digitalization of hospital system
- Front-End: jQuery, Bootstrap CSS
- Back-End: ASP.NET MVC, Microsoft SQL Server

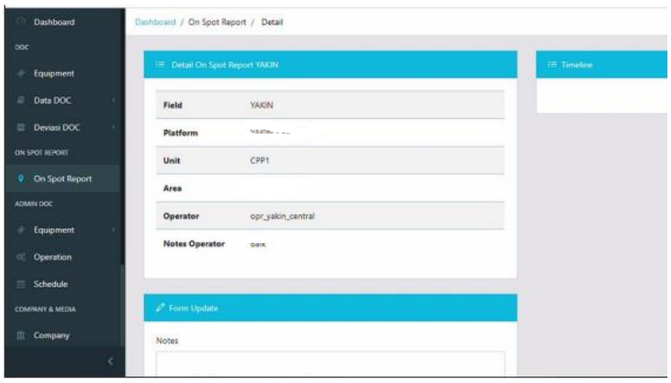
4. Trending Dashboard Basic Operational Care

- Description: One page dashboard to monitor trending chart and data visualization of digital log sheet checklist
- Front-End: Power BI
- Back-End: Microsoft SQL Server

5. Digital Log sheet

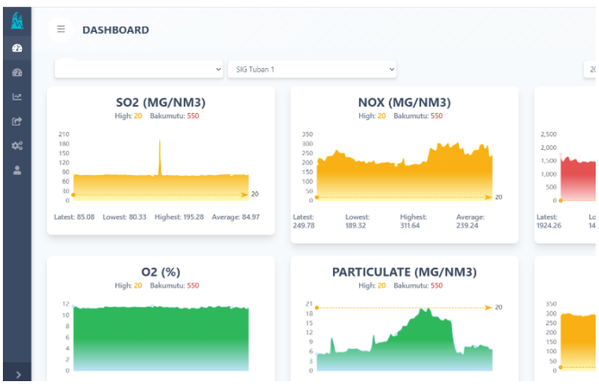
- Description: Web application to monitor digitalization of note taking in industrial level
- Front-End: (old: jQuery, Bootstrap CSS) (new: React.js, Reactstrap), e-charts library
- Back-End: (old: ASP.NET MVC), (new: .NET Core) Microsoft SQL Server, SAP ERP masted data





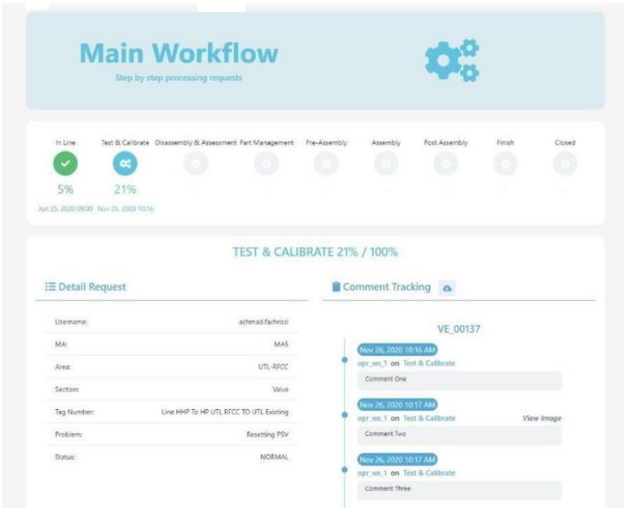
6. Continuous Emission Monitoring System

- Description: Web application to monitor emission exhaust system in real-time and shown as trending data
- Front-End: Vue.js (v2), Bootstrap CSS, WebSocket, node-red, e-charts library
- Back-End: CodeIgniter, MySQL



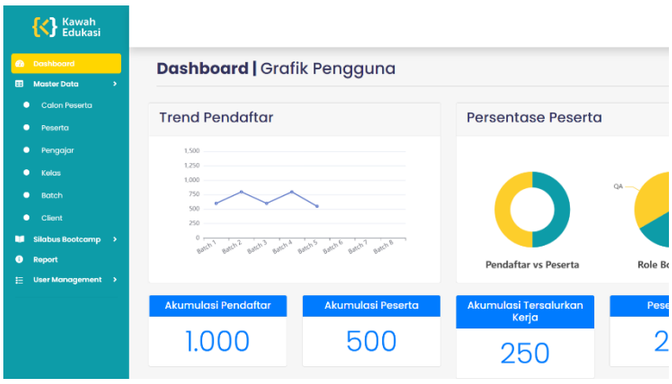
7. E-Workshop

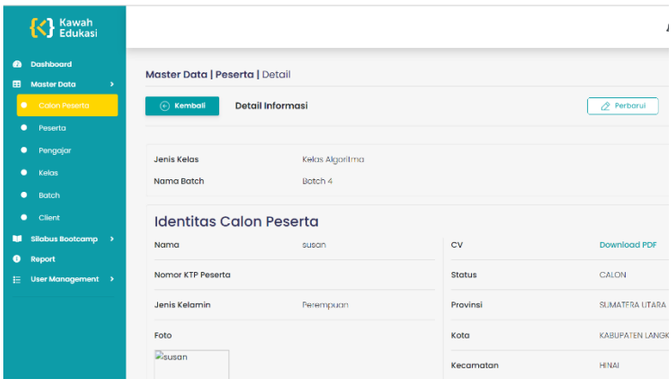
- Description: Web application to monitor digitalization of equipment's repairing process
- Front-End: Vue.js (v2), Bootstrap CSS, e-charts library
- Back-End: ASP.NET MVC, Microsoft SQL Server, SAP ERP masted data

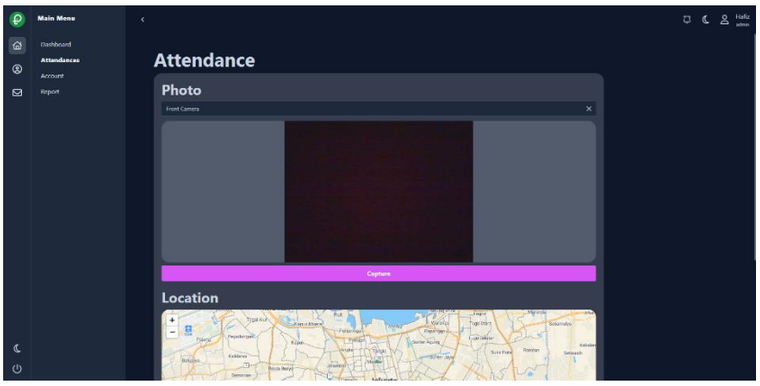


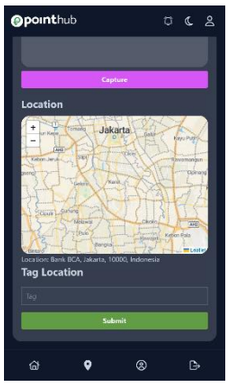
8. Management Information System

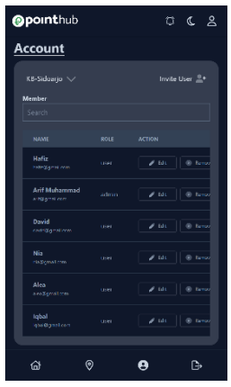
- Description: Web application to manage bootcamp participant registration
- Front-End: React.js, Redux Saga, Reactstrap

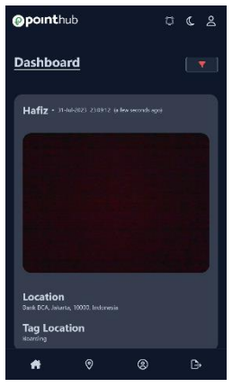




9. Pin Point








- Description: Single Page Application (SPA) to capture employee attendances based on location
- Front-End: Vue.js (v3), Pinia, Uno CSS, Leaflet.js
